TRISTAN JOHNS

• web developer •

ABOUT ME

• Captivated by exciting innovation in the ever-changing technological landscape.
• Sees the internet as one of the most powerful forces of good that Humanity is developing.
• Avid reader of many genres, both fiction and non-fiction, with a love of Philosophy and Science Fiction.

EDUCATION

2021 • Boise CodeWorks,
Full Stack Web Development.

2021 • College of Western Idaho,
AA in Philosophy.

EXPERIENCE

2021   **Boise CodeWorks, Web Development Student**
• Helped focus my team by implementing the Scrum productivity framework.
• Practiced communication of code in many pair-programming settings.
• Worked with technologies such as VueJS, Bootstrap/SASS, MongoDB and Node to create a full stack web application designed to improve productivity and coordination around hosting game nights.
• Utilized a board game API to create a search component which allowed users to keep track of board games they want, and enabled users to show their friends what games they own and are bringing to the game night.
• Created a productivity application that made several types of requests to APIs in order to display inspirational quotes, the local temperature, the present time, and a to-do list.
• Practiced designing full stack web applications according to the design mocks and the necessary data relationships.

2016–2021   **CaptionCall, Caption Agent**
• Enabled hearing impaired individuals' ability to communicate via telephone.
• Maintained consistently above-average performance metrics.
• Handled confidential information while cooperating efficiently in a team setting.
